## EDUCATION

**RMIT University Vietnam**  
Bachelor of Information Technology

March 2018 to February 2022

- Course-works cover basic aspects of the IT field with modern technologies

## ACADEMIC PROJECTS

### Online Appointment Booking System

- Developed an appointment booking system that gives users to book a meeting.
- Users can book an appointment from multiple businesses.
- Used Spring MVC and Hibernate to develop a backend application
- Practiced CI/CD pipeline (Travis and Heroku)
- Participated in the role of a backend developer

### Classification on Evaluating Spotify's Popular Song from 2000-2020

- Implemented a practical data science process: data retrieving, data wrangling to modeling, and model deployment
- Machine Learning models are deployed with local API testing with Postman

### Intelligent Trip Planner web application - Capstone project with NFQ Asia Company

- Built a web application that recommends users a full itinerary for the trip that matched users' interests and needs.
- Implemented Reactjs for frontend, Nodejs, and ExpressJS for backend and a hybrid database included PostgreSQL and Neo4j Graph.
- Integrated CI/CD pipeline (TravisCI and Heroku)
- Participated in as a backend developer and Product Owner

## EXPERIENCES

### GEEK UP Backend Developer Intern

November 2021 - January 2022

- Joined a full process of building a product within 10 weeks. Involved directly in product brainstorming and developing from Business Goal and Product Concept by collaborating with the company experts in various departments.
- Practiced SCRUM framework in project development.
- Built a web-platform product that helps GEEK Up's employees to manage and complete recurring office tasks.
- Hand-on experience of programming by using TypeScript with NestJS framework to build RESTful API.
